

**SUPPLEMENT SHEET FOR LUCKY 7 ANGUS
BULL SALE MARCH 5, 2016
SATURDAY NOON**

ALL BULLS SELL IN THEIR WORKING CLOTHES!!!

Lucky 7 Angus is the Nation's leader in selling real world bulls in their real world clothes. This allows us to offer the Nation's only 4 year guarantee. These bulls will not be near as fat as our competitors and thus will have better feet, legs and fertility to breed more cows for you. The 2 year old bulls were fed a high roughage 41 NEG ration, and limited to 1.95% of their body weight, and the yearlings ration never exceeded 43 NEG. (Typically competitors feed yearling bulls a 51-56 NEG ration at 2.8-3.1% of body weight, and 2 year olds a 46-51 NEG ration at 2.6-2.9% of their body weight.) No Lucky 7 Angus bull has ever sold with a hoof trimmed!

It is widely known overfed bulls have feet problems and break down, but what you may not realize is that it also causes fertility issues. To tell how much a bull is overfed, one can look at the average rib/back fat of the bulls in an offering. Averages above .25 are way overfed. Averages of .32 and higher would be considered slaughter ready in a feedlot. Lucky 7 Angus average rib/back fat is around .12. Bulls' scrotal circumference is another place fat is stored on bulls that are overfed. Scrotal measurements on bulls 12-14 months of age should average 32-35 cm if developed properly. If you see the averages above this the bulls are usually way overfed and will generally be less fertile. Scrotal measurements can be 3-6 cm larger on overfed bulls. Overfeeding by seedstock producers is the greatest cause of fertility issues!
